

Scambi

The Festival of Paneurethic Laboratories

Scambi is a Festival conceived and organized by a team of young under-25yo volunteers coming from all over the world.

Laboratories make up the beating heart of our festival. We invented the word “**Paneuretic**” to describe them. This adjective is composed by three Ancient Greek words: pan (everything), eurisko (knowing), ethos (way of living). Scambi’s Labs are directed by people and associations which have a specific theme as their mission

Scambi is special under many respects:

Dissolvenze is the festival section dedicated to the Cinema and an international short-movies contest. Every year our contest receives more than 150 subscriptions from all over the world.

Among the characteristic streets of the historical centre, we host our **Pinoli**: stands, shows and presentations aiming at creating a space for realities which we share basic values with. More importantly, Scambi is an accessible festival. It is open to and enjoyable by everyone, independently from age, genre, political and religious beliefs, sexuality, physical or mental disabilities.

Our roots are firmly established in **La Pigna**, the historical centre of Sanremo, while our branches extend further than Liguria and Italy.

Among Scambi’s most important ambitions there is the one of developing a symbiosis between the local and the international dimension, mixing and moving – literally – distant cultures. We have a particularly stable and strong link with **Libera** Association and the **E!State Liberi** summer camp they organize.

We are proud to acknowledge that Scambi Festival is one of those experiences which are hard to communicate and tell to who have not lived them. Given that, we try to represent Scambi by choosing a few pictures, realizing a **short documentary** of the previous edition (find the link below) and summarizing our values in the Manifesto of Scambi Festival.

Get ready to sail off to a future rich of solidarity and empathy, we are waiting for you!
